CANNOT BE DETERMINED TO MEET () the minimum standards established by the West Virginia Bureau of Public Health.

To correct a health hazard, modifications to existing systems may be done to improve part of a system. Such modifications may not be able to be designated as a does meet system since inadequate information is known.

Although many factors contribute to the successful functioning of a sewage disposal system, this office recommends water conservation and maintaining an even usage of water throughout the week.

February 23, 2010

Hampshire County Planning Commission
P. O. Box 883
Romney, WV 26757

Dear Sirs;

This office has reviewed a plat of survey for Christopher Wolford to a lot located in the Bloomery, and further referenced as Tax Map 8, Parcel 14, Deed book 414, Page 611. This lot consists of 2.00 acres. All lots require a percolation test and a sewage disposal area of 10,000 square feet where no development or structures other than the septic system shall be permitted. This lot is to be developed with an individual well and septic system to serve a single family dwelling.

Percolation test results are within limits as set forth by West Virginia CSR 16-1. Six foot soil observation holes indicate no restrictions due to water table or shallow bedrock within the designated sewage disposal area **except as noted on the Health Department subdivision application.**

The plat of survey dated February 19, 2010 is hereby approved by the Hampshire County Health Department for a Class I sewage system. Any changes or revisions to the Health Department stamped and signed plat, or subsequent final plats approved based upon the approved plat, will make this approval null and void.

This approval is not a permit for individual water systems or individual sewer systems. Applications for permits must be made separately to the Hampshire County Health Department.

Sincerely,
Jim Kinder R.S.

cc: Christopher Wolford
