(d) Availability and Condition of Reference Monuments
Survey of 1831 (Stauben County) by reference to a tract and in the description prepared for the Plat survey of Township 37 North, Range 14 East. The and most were perpetuated with corner stones during later years. The parent tract has been previously provided to our office. Although no theory of location was established, this line is called out in the legal North 1/2 of the Northwest 1/4 of the Northeast establish the quarter sections, subdividing the North the Northwest 1/4 of the Northeast 1/4, and further halves which would establish the South boundary of Survey Co. was found during our research which is the East side of the surveyed parcel, with the South line of the Jones tract. Since the bearing of Jones tract, from which Mild's Meadow has been taken same bearing and are staked on a straight line, there is no evidence is shown on the survey regarding how Therefore, a decision was made to hold the line as made in the description regarding this line being as Jones was conveyed by Document #06110487, but Other monuments found that are shown on these marking the corners, with only minor variances noted since they are called for by deed and shown either tract. The pipe called for at the center of Section any section is subject to debate regarding how it Section 20 (North 1/4 corner of Section 29) is marked although the nine was obviously used by Accurate
