[illegible][illegible][illegible][illegible]

1. The first 1000 m of the section is composed of a sequence of alternating sandstone and shale units. The sandstone units are typically 10-20 cm thick and contain small, rounded pebbles of quartz and feldspar. The shale units are typically 5-10 cm thick and contain small, rounded pebbles of quartz and feldspar.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

$\frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{x^2} dx = \frac{1}{2} \left(\lim_{x \rightarrow -\infty} \frac{1}{x} - \lim_{x \rightarrow \infty} \frac{1}{x} \right) = \frac{1}{2} (0 - 0) = 0$
