RE: Water Service Connections At Forest View Addition

You asked for information about connecting to city water in the Forest View Addition Subdivision on the east edge of Thompson Falls:

When Mr. Norton installed water lines in the subdivision, he had water service connections placed at each of the lots. If a lot owner requests a new water service, the city crew will install a frost-free pit and a water meter on city property near the property line. The cost of a meter and meter pit is currently \$560. Each owner is responsible for all water lines installed on their property.

Please note that the city did install some meter pits at vacant lots in Forest View Addition. Even though this equipment is already there, when a water service connection is requested, the owner will be charged for a meter and a frost-free pit.

If you have other questions or concerns about water hook-up fees in Forest View Addition, please feel free to call.

Thank you!
