Come enjoy this gorgeous alpine contemporary home with its majestic mountain views as seen from the huge wrap-around deck. On cold wintry days sit in the living area beside the massive stone-faced fireplace as it radiates warmth to the interior of the house.

Climb the beautiful stairway to the balcony overlooking the great room. The upper level features two bedrooms and a full bath with an overhead roof sky-light. The master bedroom, located on the first floor, has a full jacuzzi. On warm summer days open the balcony windows and enjoy the fresh mountain air. Feel the warm morning sun and view the outside world through the spacious, insulated Andersen windows. The kitchen features a Jenn Air Range/Grill, pantry, snack bar, and plenty of counter space. The oak kitchen cabinets match the beautiful oak floors. Go down the spiral staircase to the double garage with half bath, back-up wood furnace, central vacuum and security system. There is also an outbuilding and under-deck storage for tools and equipment and back up 5KV generator. This wonderfully landscaped dream home is just waiting for you to hunt, hike, sight-see, horse-back ride and trout fish in nearby National Forest.
