To whom it may concern,

This letter is to verify that a preliminary soil evaluation was performed on a 2 acre tract off Powell-Sullivan Rd. in Williamson Co. The soil on this tract was evaluated for subsurface sewage disposal possibilities. A large area of suitable soil was located on the property. The soil was identified as the Sugargrove-Sengtown series with an estimated absorption rate of 45-60 minutes per inch. The area appeared to be about 20,000 sq. ft.+. Depending on final soil mapping results, this should be adequate for a four bedroom septic disposal area. The approximate area is shown on the satellite image provided and is marked with orange survey ribbon onsite. **These findings are based on a preliminary evaluation only. Extra high intensity soil mapping, property line and easement locations will be required for final approvals. Only the Williamson County Department of Sewage Disposal has the authority to determine the number of bedrooms and system approvals.** For any questions please contact me at 615-210-5523.

Sincerely,

J. Michael Haarbauer
