Burns, Dickson County, Tennessee  
S&ME Project No. 41-4718-033

Dear Mr. Ford:

S&ME, Inc. (S&ME) completed a Limited Human Health Risk Evaluation related to potential exposure to a constituent detected on two occasions in waters of Beaverdam Creek and an associated spring. It is believed this constituent is being transported to the spring via groundwater migration from a nearby industrial facility.

The Limited Human Health Risk Evaluation revealed that direct exposure to waters in the spring and creek via dermal absorption and ingestion will not result in an unacceptable carcinogenic risk or non-carcinogenic hazard. For details, please refer to the Limited Human Health Risk Evaluation report dated July 31, 2018.

S&ME appreciates the opportunity to be of service to you on this project. If you have any questions regarding this letter, or if we may be of any further assistance, please contact us at (615) 385-4144.

Sincerely,

**S&ME, Inc.**
