**2015-2019 ACS Estimate:** The American Community Survey (ACS) replaces census sample data. Esri is releasing the 2015-2019 ACS estimates, five-year period data collected monthly from January 1, 2015 through December 31, 2019. Although the ACS includes many of the subjects previously covered by the decennial census sample, there are significant differences between the two surveys including fundamental differences in survey design and residency rules.

Margin of error (MOE): The MOE is a measure of the variability of the estimate due to sampling error. MOEs enable the data user to measure the range of uncertainty for each estimate with 90 percent confidence. The range of uncertainty is called the confidence interval, and it is calculated by taking the estimate +/- the MOE. For example, if the ACS reports an estimate of 100 with an MOE of +/- 20, then you can be 90 percent certain the value for the whole population falls between 80 and 120.

**Reliability:** These symbols represent threshold values that Esri has established from the Coefficients of Variation (CV) to designate the usability of the estimates. The CV measures the amount of sampling error relative to the size of the estimate, expressed as a percentage.

- High Reliability: Small CVs (less than or equal to 12 percent) are flagged green to indicate that the sampling error is small relative to the estimate and the estimate is reasonably reliable.
- Medium Reliability: Estimates with CVs between 12 and 40 are flagged yellow-use with caution.
- Low Reliability: Large CVs (over 40 percent) are flagged red to indicate that the sampling error is large relative to the estimate. The estimate is considered very unreliable.

#### SECTION 400 - NATURAL RESOURCE DISTRICT

# 402. EXCLUSIVE FARM USE DISTRICT (EF-80, EF-40, and EF-20)

[Last amended 9/22/11, Ord 867; 5/24/2012 Ord 872; 08/01/18; Ord. 903]

#### 402.01 Purpose.

The purpose of the Exclusive Farm Use District is to identify and protect land designated as Exclusive Farm Use on the Comprehensive Plan that is suitable and desirable for commercial agricultural operations and other uses which are compatible with such operations. Properties in the Exclusive Farm District are primarily large, contiguous relatively flat terrace, valley-floor or low foothill holdings. In Exclusive Farm Use Districts, nonfarm residential and other development which might likely be affected by normal farm management practices, will be limited or prohibited so as to maximize the productivity potential of vicinity farmlands.

#### 402.02 Permitted Uses.

In the Exclusive Farm Use District, the following uses shall be permitted subject to the standards and limitations set forth in subsection 402.09 and any other applicable provisions of this ordinance:

- A. Farm uses as defined in Subsection 402.10.
- B. Farm stands subject to a Type A miscellaneous land use application to evaluate health and safety requirements such as access, parking and sewage disposal, and to determine if:
  - 1. The structures are designed and used for the sale of farm crops or livestock grown on the farm operation, or grown on the farm operation and other farm operations in the local agricultural area, including the sale of retail incidental items and fee-based activity to promote the sale of farm crops or livestock sold at the farm stand if the annual sale of incidental items and fees from promotional activity do not make up more than 25 percent of the total annual sales of the farm stand; and
  - 2. The farm stand does not include structures designed for occupancy as a residence or for activity other than the sale of farm crops or livestock and does not include structures for banquets, public gatherings or public entertainment.

[Amended 12/05/02; Ord. 720; 5/24/2012; Ord 872]

- C. Propagation and harvesting of a forest product.
- D. Creation of, restoration of, or enhancement of wetlands.
- E. A facility for the processing of farm crops\_located on a farm operation and provides at least one-quarter of the farm crops processed at the facility. The building established for the processing facility shall not exceed 10,000 square feet of floor area exclusive of the floor area designated for preparation, storage or other farm use or devote more than 10,000 square feet to the processing activities within another building supporting farm uses. The application will also be subject to Section 1101, Site Design Review.

  [Added 3/19/98, Ord. 643; amd Ord 872]

- F. Utility facilities necessary for public service, including wetland waste treatment systems but not including commercial facilities for the purpose of generating electrical power for public use by sale, or transmission towers over 200 feet in height. The applicant will also be subject to Section 1101, Site Design Review. A facility is "necessary" if it satisfies the requirements of ORS 215.275.

  [Amended 12/05/02; Ord. 720]
- G. Accessory uses, including buildings other than dwellings customarily provided in conjunction with farm use.

- K. Signs, pursuant to the sign provisions set forth in Section 1006.
- L. The following transportation facilities:
  - 1. Climbing and passing lanes within the right of way existing as of July 1, 1987.

  - (a) Identify the study area. This includes all the land in the tracts wholly or partially within one mile of the perimeter of the subject tract;

  - (c) Determine the potential earning capability for each tract by multiplying the number of acres in each land class by the gross sales per acre for each land class provided by the Land Conservation and Development Commission pursuant to OAR 660-33-135(4). Add these to obtain a potential earning capability for each tract;
  - (d) Identify those tracts capable of grossing at least \$10,000 based on the data generated in subsection (6)(c) of this Section;
  - (e) Determine the median size and gross sales capability for those tracts capable of generating at least \$10,000 in annual gross sales to use in subsections (1) and (2) of this Section. [Subsection D added 3/19/98, Ord. 643]

- 4. The secondary dwelling will be located:
  - (a) On the same lot or parcel as the primary farm dwelling; or

- H. Replacement dwelling to be used in conjunction with farm use if the existing dwelling has been listed in the county inventory as historic property and on the National Register of Historic Places (Type A notice).
- I. Principal dwelling not provided in conjunction with farm use on a lot or parcel created before January 1, 1993, subject to the following standards and criteria (Type B notice):
  - 1. The dwelling or activities associated with the dwelling will not force a significant change in or significantly increase the cost of accepted farming or forest practices on nearby lands devoted to farm or forest use.
  - 2. The dwelling will be sited on a lot or parcel that is predominantly composed of Class IV through VIII soils that would not, when irrigated, be classified as prime, unique, Class I or II soils. Soil assessments may be submitted from a professional soil classifier pursuant to OAR 660-033-0030. [Amended 5/24/12; Ord. 872]
  - 3. The dwelling will be sited on a lot or parcel created before January 1, 1993.
  - 4. The dwelling will not materially alter the stability of the overall land use pattern of the area. In determining whether a proposed nonfarm dwelling will alter the stability of the land use pattern of the area, the cumulative impact of possible new nonfarm dwellings on other lots or parcels in the area similarly situated shall be considered. To address this standard, the county shall:
    - (a) Identify a study area for the cumulative impacts analysis. The study area shall include at least 2000 acres or a smaller area not less than 1000 acres, if the smaller area is a distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish

it from other, adjacent agricultural areas. Findings shall describe the study area, its boundaries, the location of the subject parcel within this area, why the selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or nonresource uses shall not be included in the study area;

- (b) Identify within the study area the broad types of farm uses (irrigated or nonirrigated crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, nonfarm, hardship, etc.) And the dwelling development trends since 1993. Determine the potential number of nonfarm/lot of record dwellings that could be approved, including identification of predominant soil classifications, the parcels created prior to January 1, 1993 and the parcels larger than the minimum lot size that may be divided to create new parcels for nonfarm dwellings under ORS 215.263(4). The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval of the possible nonfarm dwellings under this subparagraph;
- (c) Determine whether approval of the proposed nonfarm/lot-of-record dwellings together with existing nonfarm dwellings will materially alter the stability of the land use pattern in the area. The stability of the land use pattern will be materially altered if the cumulative effect of the existing and potential nonfarm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase or lease farmland, acquire water rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.
- 5. The dwelling complies with other conditions the county considers necessary, including but not limited to provision for sewage disposal, emergency vehicle access, and public road approach.
- 6. The tract on which the dwelling is to be sited does not include a dwelling.
- 7. Prior to issuance of a residential building permit, the applicant shall provide evidence that the county assessor has disqualified the lot or parcel for valuation at true cash value for farm or forest use; and that additional tax or penalty has been imposed, if any is applicable, as provided by ORS 308A.050 to 308A.128 or other special assessment under ORS 308A.315, 321.257 to 321.390, 321.700 to 321.754 or 321.805 to 321.855 and any additional tax imposed as the result of disqualification has been paid. A parcel that has been disqualified under this subsection shall not re-qualify for special assessment unless, when combined with another contiguous parcel, it constitutes a qualifying parcel.

[Subsection I amended 8/13/98, Ord. 657; Amd 5/24/12 Ord 872]

The governing body of a county must interpret the center of the subject tract as the geographic center of the flaglot if the applicant makes a written request for that interpretation and that interpretation does not cause the center to be located outside the flaglot. Up to two of the four dwellings may lie within an urban growth boundary, but only if the subject tract abuts an urban growth boundary;
    - i. "Flaglot" means a tract containing a narrow strip or panhandle of land providing access from the public road to the rest of the tract.
    - ii. "Geographic center of the flaglot" means the point of intersection of two perpendicular lines of which the first line crosses the midpoint of the longest side of a flaglot, at a 90-degree angle to the side, and the second line crosses the midpoint of the longest adjacent side of the flaglot.

  - The lot or parcel cannot practicably be managed for farm use, by itself or in (a) conjunction with other land, due to extraordinary circumstances inherent in the land or its physical setting that do not apply generally to other land in the vicinity. For the purposes of this section, this criterion asks whether the subject lot or parcel can be physically put to farm use without undue hardship or difficulty because of extraordinary circumstances inherent in the land or its physical setting. Neither size alone nor a parcel's limited economic potential demonstrate that a lot or parcel cannot be practicably managed for farm use. Examples of "extraordinary circumstances inherent in the land or its physical setting" include very steep slopes, deep ravines, rivers, streams, roads, railroad or utility lines or other similar natural or physical barriers that by themselves or in combination separate the subject lot or parcel from adjacent agricultural land and prevent it from being practicably managed for farm use by itself or together with adjacent or nearby farms. A lot or parcel that has been put to farm use despite the proximity of a natural barrier or since the placement of a physical barrier shall be presumed manageable for farm use;
  - (b) The dwelling will comply with the provisions of Section 402.07(A); and
