

Approximately 7 acres in production
Ages of trees range from 1 yr -25 yrs

Orchard

Peaches: 775 trees

In order to keep the peach orchard productive and continually producing, each year an aging row is removed and a new row is planted to replace it. Trees can range in age from 1 yr to 25 yrs. There are over 25 different varieties of peaches in production. During the harvest season we have a continual harvest of different varieties ripening in succession. This allows our farmers market table to be every changing and always a different flavor of delicious. Of our most popular varieties there are about 100 trees planted. Those focus varieties include: Springcrest, June Pride, Suncrest, O'Henry. For lesser known varieties, there may be as few as 1 tree, or as many as 10.

Other Stone Fruit:
