(Stewart County)

CORN & FEED

The Corn House is a fully operational hardware and wildlife feed operation offering corn and feed as well as bagging and cleaning. The cleaning operation offers custom cleaning and bagging of customers' grain and has a retail operation providing wildlife feed, seed, and food plot fertilizer. It also offers hardware, lumber, and other hunting supplies. This is a commercial-grade cleaning and bagging facility that would make for a fantastic business opportunity and is located in the middle of a very heavily hunted region of the state. All inventory conveys with the sale.
