If the answer to any of the items in Section 3 is Yes, explain (attach additional sheets if necessary):

Previous Roof Repairs – Seepage from chimneys - roofer came out and sealed around the chimney. (2021) **Water Damage Not Due to a Flood Event** – In 2017, there was a heavy, sideways rain that blew water in to the breezeway, causing seepage through the entry door to the main house. Additionally, water ran down the stub-out to the 2nd bathroom in the main house, which was not properly sealed, causing damage to the ceiling in that bathroom. All areas were properly dried, baseboards and drywall replaced, and the stub-out was properly sealed. There was no structural damage and have been no further incidents. This was prior to the addition of the East awning, which also deters rain from entering the breezeway.
