Taxes

Two major components of your property tax calculation are Exemptions and Tax Rates which are both determined by your Taxing Units (School District, County, City, etc.). **These are NOT determined by the Appraisal District or Tax Office.**

Taxes Due = (Taxable Value * Tax Rate) / 100

Taxable Value = Assessed Value – Exemptions

Note: Exemptions might include Homestead, Over65, Disabled Person, Disabled Veteran, etc.

NO NEW REVENUE RATE

A calculated rate that would provide the taxing unit with approximately the same amount of revenue it received in the previous year on properties taxed in both years. This rate calculation does not include the impact of additional tax revenue resulting from new construction.

Note: For school districts, the tax rate that would maintain the same amount of state and local revenue per weighted student that the district received in the school year beginning in the

preceding tax year.

VOTER-APPROVAL RATE

Tax rate level that allows the taxing jurisdiction to collect more taxes, not including debt repayment, than the previous year. This is the maximum tax increase allowed by law without triggering an election to "rollback" the taxes.

Estimated Taxes

This is the amount of estimated tax calculated using the adopted tax rate from the previous year times the tax table value from the current year.

ADOPTED RATE

This is the tax rate that was adopted by the taxing unit for the specified tax year.
