

Buildings and Structures	
Cabin	The home is a 1975 single family home of wood frame construction, one story, with tin roof. The home is currently used as a 2 bedroom with den adjoining the man bedroom. There are 2 full baths and a large covered porch. The home features updated windows, wood floors, central air & heat, wood stove heat, private gas heat, modern kitchen, distant creek views and panoramic forest views.
Water / Sewer	The property has a well pump and some of the best water you will ever taste straight from the tap. There is a private septic tank behind the cabin.
The Main Barn	There is a tall barn large enough to park 2 cars with concrete floor, wood frame construction, currently utilized as a workshop and for storage. There is a car lift and enough antique tools to open an antique shop. There is a metal carport on the front of the barn.
Stilt Barn	Behind the main barn is a secondary stilt barn. Some of the oversized beams are from timber on the property. The building is about 30 feet tall with a mezanine level for storage. The building is large enough to park at least 4 vehicles and currently is utilized as covered parking for our front loader back hoe as well as a range of vehicle types.
Brew House	There is currently a brew house shed which has power and water.
Wood Shed	There is an open wood shed with metal roof and extra carport style parking.
Pump House	There is a wood frame shed on a slab which houses the water pump.
Green House	There is a greenhouse on site (towards the knoll).
