4. DISCLOSURE.

5. Minnesota Statute 103I.235 requires that, before signing an agreement to sell or transfer real property, Seller must disclose information in writing to Buyer about the status and location of all known wells on the property. This requirement is satisfied by delivering to Buyer either a statement by Seller that Seller does not know of any wells on the property, or a disclosure statement indicating the legal description and county, and a map showing the location of each well. In the disclosure statement Seller must indicate, for each well, whether the well is in use, not in use or sealed.

10. Unless Buyer and Seller agree to the contrary in writing, before the closing of the sale, a Seller who fails to disclose the existence or known status of a well at the time of sale, and knew or had reason to know of the existence or known status of the well, is liable to Buyer for costs relating to sealing of the well and reasonable attorneys' fees for collection of costs from Seller, if the action is commenced within six years after the date Buyer closed the purchase of the real property where the well is located.

15. Legal requirements exist relating to various aspects of location and status of wells. Buyer is advised to contact the local unit(s) of government, state agency, or qualified professional which regulates wells for further information about these issues. For additional information on wells, please visit the Minnesota Department of Health's website at www.health.state.mn.us.
