Dear Mr. Sime:

Subject: Response to a Drainage Req

This letter is in response to your AD-10 requested to add new tile. **You will need to contact our office before you start tiling.**

SENDER: COMPLETE THIS SECTION

- Complete items 1, 2, and 3. Also complete item 4 if Restricted Delivery is desired.
- Print your name and address on the back so that we can return the card to you.
- Attach this card to the back of the envelope or on the front if space permits.

1. Article Addressed to:

PS Form 3800, August 2006

Domestic Return Receipt

New Tile: (Wetlands)

New tile to be installed as marked in crosshatched areas on the attached aerial photo will affect a wetland. Please refer to the attached wetland map for drainage system and wetland locations. Installation of the tile within the crosshatched area on the wetland map(s) will convert the wetland and jeopardize USDA program eligibility. In addition, tile installed up-slope of these wetlands can jeopardize USDA program eligibility if the drainage flows into the wetlands are reduced. If your intention is to install tile as described above or if you would like us to clarify this information, contact our office before proceeding. Contact the FSA office to determine what effect this action will have on your USDA program benefits. If you are unfamiliar with the drainage systems certified by scope and effect on this property, please stop by our office to review this information. Other local, state and federal agencies may need to be contacted should you proceed with this action.

New Tile: (Not Inventoried)

Proposed tile work as drawn in blue on the attached aerial photo may contain "Other Waters (OW) of the United States", as administered by the Corps of Engineers (COE). You will be responsible to contact them at 605-224-8531 to ask if a Clean Water Act (CWA) permit is required for this action. If you receive a copy of a COE response please send to the NRCS office once received. Please refer to the attached wetland map for drainage system and wetland locations. Do not place clean-out material in wetland basins or conduct excessive drainage maintenance. Failure to stay within these limits will jeopardize USDA program eligibility. If you are unfamiliar with the drainage systems certified by scope and effect on this property, please stop by our office to review this information.

New Tile: (No Wetlands)

New tile to be installed in non-blue and non-crosshatched areas as marked on the attached aerial photo will not affect a wetland. Please refer to the attached wetland map for drainage system and wetland locations. Tile may be installed in non-blue and non-crosshatched areas on the wetland map without jeopardizing USDA program eligibility provided wetlands designated on the map are not tiled. Other local, state and federal agencies may need to be contacted should you proceed with this action.

It is your responsibility to ensure that your actions do not impact wetlands protected by a United States Fish and Wildlife Service (FWS) or any other conservation easement. For any questions regarding FWS conservation easements on the tract or adjacent land, please contact the wetland management district office located in Madison, SD, at (605) 256-2974. For any other easements, please contact the local Natural Resources Conservation Service (NRCS) office

United States

P.O. Box 348
Clear Lake, SD 57226-0348

*This final technical determination is for USDA and Clean Water Act (CWA) purposes only. It is not a County drainage permit, nor is it a US Army Corps of Engineers 404 Permit, which may also be required. **You are responsible for complying with other federal, state, or local regulations and obtaining other permits as they apply to altering wetlands and drainage flows. Contact the appropriate agencies for more information. You are also responsible to make all necessary arrangements with other landowners affected by your proposed actions should you choose to proceed. If you plan to conduct any new drainage, earthmoving, tree removal or drainage maintenance activities not covered by this referral you should sign a new AD-1026 form.***

It is your responsibility to ensure that your actions do not impact wetlands protected by a United States Fish and Wildlife Service (FWS) or any other conservation easement. For any questions regarding FWS conservation easements on the tract or adjacent land, please contact the wetland management district office located in Madison, SD, at (605) 256-2974. For any other easements, please contact the local Natural Resources Conservation Service (NRCS) office.

If you have any questions regarding this matter, please contact me at (605) 874-8225 extension 3.

Sincerely,

Valorie Dupraz
District Conservationist

CERTIFIED MAIL – RETURN RECEIPT REQUESTED

Blake Sime
16315 484th Ave
Revillo, SD 57259-6609

Dear Mr. Sime:

As a result of your request for a certified wetland determination via form AD-1026, Highly Erodible Land Conservation (HELCS) and Wetland Conservation (WC) Certification, from the **Deuel** County Farm Service Agency Office, based on a site visit of **6/24/10**, I have made a preliminary certified wetland determination for tract **995** located in Section **1**, **T117N R48W**, in **Deuel** County, South Dakota (SD).

Please refer to the attached certified wetland map provided as a part of this preliminary technical determination to help you understand the explanations contained in this letter.

All areas identified on the attached certified wetland determination maps are considered part of the preliminary technical determination. The remaining areas of the tract not covered by this preliminary technical determination retain their original wetland determination. Please also refer to Section 2 of the NRCS-CPA-026E, Highly Erodible Land and Wetland Conservation Determination, for a listing of the wetlands identified.

This determination is neither a county drainage permit nor a United States Army Corps of Engineers (COE) 404 permit, which may also be required. You are responsible for complying with other federal, state, and local regulations as they apply to altering wetlands and drainage flows. You are also responsible to make all necessary arrangements with other landowners affected by your proposed actions should you choose to proceed.

It is your responsibility to ensure that your actions do not impact wetlands protected by a United States Fish and Wildlife Service (FWS) or any other conservation easement. For any questions regarding FWS conservation easements on the tract or adjacent land, please contact the wetland management district office located in Madison, SD, at (605) 256-2974. For any other easements, please contact the local Natural Resources Conservation Service (NRCS) office.

The Wetland Conservation (WC) Provisions of the Food Security Act (FSA) of 1985 prohibit United States Department of Agriculture (USDA) program participants from converting wetlands to agricultural use. Persons who convert wetlands (CW) after November 28, 1990, are ineligible for USDA program benefits, until the CW's are restored or mitigated.

This preliminary technical determination has been conducted for the purpose of implementing the WC Provisions of the FSA of 1985. This determination may not be valid for identifying the extent of the COE Clean Water Act jurisdiction for this site. If you intend to conduct any activity that constitutes a discharge of dredged or fill material into wetlands or Other Waters, you should request a jurisdictional determination by contacting the COE, (605) 224-8531, Pierre, SD, before starting the work.

There may be opportunities to utilize mitigation if you have an interest in converting the labeled wetlands (W's), farmed wetlands (FW's), and farmed wetland pasture (FWP), found in this determination. Mitigation is the

compensation of lost wetlands through wetland restoration, enhancement, or the creation of new wetlands. Mitigation can not occur at the expense of the federal government. Mitigated wetlands must be in the same local watershed as the wetlands you wish to convert. The landowner must grant an easement that remains in effect as long as the original W(s) remains converted and the easement will be recorded on public land records for the mitigated wetlands. All of the above activities, as well as, a mitigation plan, must be completed before any wetland conversions could occur.

You may appeal this preliminary technical determination in accordance with the laws and federal regulations set forth at 7 CFR 614, the NRCS Appeals Procedures, 7 CFR 780, the Food Security Act Appeals Procedures, and 7 CFR 11, the National Appeals Division (NAD) Rules of Procedure, as follows:

- (1) A field visit will be made by the NRCS to review with you the basis for our preliminary technical determination, answer any questions you have concerning the determination, and to gather additional information from you concerning the preliminary determination.

Within 15 days of the field visit, the NRCS will reconsider the preliminary technical determination:

- A. If the reconsidered determination is no longer adverse to the participant, a final technical determination will be issued.
- B. If the reconsidered determination remains adverse the preliminary technical determination and agency record will be forwarded to the assistant state conservationist for field operations for a final technical determination; a final technical determination will be issued as soon as practicable. The technical determination issued becomes a final technical determination upon receipt by the participant.

OR

- (2) Mediation may be used in an attempt to settle your concerns with the preliminary technical determination:

Contact: Shaun T. Vickers
State Resource Conservationist
Natural Resources Conservation Service
200 Fourth Street SW
Huron, South Dakota 57350-2475
Phone: (605) 352-1234
Fax: (605) 352-1261

If none of the previously discussed options have been selected, **this determination becomes final 30 days after the date this letter is received.** If the final technical determination is a result of the expiration of the 30-day period following receipt of this preliminary technical determination, it may be appealed to either of the following:

- Appeal to the Deuel County Farm Service Agency County Committee

United States
Department of
Agriculture

Natural Resources
Conservation
Service

222 Fourth Avenue South
P.O. Box 348
Clear Lake, SD 57226-0348

OR

- Appeal to the NAD at the following address:

National Appeals Division, Western Regional Office
755 Parfet Street, Suite 494
Lakewood, Colorado 80215-5506
Phone: (800) 541-0483 or (303) 236-2862
TTY: (800) 497-0253
Fax: (303) 236-2820

If you are the owner of this tract of land and have a tenant, I urge you to discuss this letter and accompanying NRCS-CPA-026E with your tenant. Likewise, if you are the tenant of this tract of land, I urge you to discuss this letter with your landlord.

Sincerely,

Valorie Dupraz
District Conservationist

HIGHLY ERODIBLE LAND AND WETLAND CONSERVATION DETERMINATION

Name Address:	Blake Sime	Request Date:	7/29/08	County:	Deuel
Agency or Person Requesting Determination:	Farm Service Agency	Tract No:	995	FSA Farm No.:	

Section I - Highly Erodible Land

(Y/N)

Is a soil survey now available for making a highly erodible land determination?	
Are there highly erodible soil map units on this farm?	
Fields in this section have undergone a determination of whether they are highly erodible land (HEL) or not; fields for which an HEL Determination has not been completed are not listed. In order to be eligible for USDA benefits, a person must be using an approved conservation system on all HEL.	

Field(s)	HEL(Y/N)	Sodbust(Y/N)	Acres	Determination Date

The Highly Erodible Land determination was completed in the

Section II - Wetlands

Are there hydric soils on this farm?	Y
Fields in this section have had wetland determinations completed. See the Definition of Wetland Label Codes for additional information regarding allowable activities under the wetland conservation provisions of the Food Security Act and/or when wetland determinations are necessary to determine USDA program eligibility.	

Field(s)	Wetland Label*	Occurrence Year (CW)**	Approximate Acres	Determination Date	Certification Date
	NW		84	6/24/10	6/29/10
	FW		1.6	6/24/10	6/29/10
	NI		70.1	6/24/10	6/29/10

The wetland determination was completed in the

Field

It was mailed to the person on

6/29/2010

Remarks: Wetland acres were estimated. Please call w questions 874-8225 ext.3

I certify that the above determinations are correct and were conducted in accordance with policies and procedures contained in the National Food Security Act Manual.

Signature	Designated Conservationist	Date
		6/29/2010

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.

***DEFINITIONS OF WETLAND LABEL CODES**

AW	Artificial Wetland. An area that is artificial or irrigation induced wetland. These wetlands are not subject to the wetland conservation provision.
AW/FW	An area that contains both AW and FW.
AW/W	An area that contains both AW and W.
CC	Commenced Conversion exemption.
CPD	Corps Permit Decision. Corps of Engineers permit decisions regarding section 404 of the Clean Water Act will be relied upon to satisfy the wetland conservation provisions of the Food Security Act of 1985, as amended.
CMW	An area that receives a Categorical Minimal Effect determination.
CW	Converted Wetlands. An area converted between December 23, 1985 and November 28, 1990. IN any year that an agricultural commodity is planted on these converted wetlands, you will ineligible for USDA benefits.
**CW+year	An area converted after November 28, 1990. You will be ineligible for USDA program benefits until this wetland is restored.
CWNA	Converted Wetland Non-Agricultural use. A wetland area converted to other than agricultural commodity production.
CWTE	Converted Wetland Technical Error. An area converted or commenced based on an incorrect NRCS determination or misinformation from a NRCS or FSA employee.
FW	Farmed Wetland. An area that is farmed wetland; was manipulated and planted before December 23, 1985, but still meets wetland criteria. These may be farmed and maintained in the same manner as long as they are not abandoned.
FWP	Farmed Wetlands Pasture. An area that is pasture or hayland, manipulated before December 23, 1985 but still meets wetland criteria. These may be farmed and maintained in the same manner as long as they are not abandoned.
MIW	Mitigation Wetlands. Wetlands on which a person is actively mitigating a frequently cropped area or a wetland converted between December 23, 1985 and November 28, 1990. A converted wetland, farmed wetland, or farmed wetland pasture on which functions and values were lost are compensated for through wetland restoration, enhancement or creation.
MW	Minimal effect Wetland. An area determined to be minimal effect. These wetlands are to be farmed according to the minimal-effect agreement signed at the time the minimal-effect determination was made.
MWM	An area determined to be minimal effect with mitigation.
NI	Not Inventoried – No wetland determination has been completed.
NW	Non-Wetland. An area that does not contain a wetland.
NW/NAD	An area determined to be a non-wetland resulting from a decision from the National Appeals Division.
OW	Other Waters of the U.S. Area that fall under the jurisdiction of the Clean Water Act.
PC	Prior Converted cropland, which was drained filled, or manipulated before December 23, 1985; was cropped prior to December 23, 1985; was not abandoned; and does not meet FW criteria. These are not subject to the wetland conservation provision unless the area reverts to a wetland as a result of abandonment.
PC/NW	An area that contains both PC and NW.
TP	Third Party Exemption.
W	Wetlands. An area meeting wetland criteria, including wetland farmed under natural conditions. If you plan to clear, drain, fill, level or manipulate these areas, contact NRCS and the Army Corp of Engineers prior to any such activity.
WX	A wetland area that has been manipulated after December 23, 1985, but was not, for the purpose of making production possible and production was not made possible. These include wetlands manipulated by drainage, maintenance agreements.

HIGHLY ERODIBLE LAND CONSERVATION (HEL) AND WETLAND CONSERVATION (WC) CERTIFICATION

(See Page 3 for Nondiscrimination, Public Burden and Privacy Act Statements).

1. Name of Producer Blake Sime		2. I.D. Number (Last 4 digits only) 3454	3. Crop Year 2008
4. Do you have any interest in land that produces or could produce an agricultural commodity? If "YES", or, if you are a Farm Loan Applicant continue with Item 5. If "NO", and you are not a farm loan applicant, go to Item 12 and sign and date.			YES NO ✓
5. For farm loan applicants only: Will you conduct any activities for fish production, trees, vineyards, shrubs, building construction, or other non-agricultural purposes on lands for which a wetland determination has not been completed by NRCS?			
6. Are you a landlord or tenant on any farm that will not be in compliance with HELC and WC provisions? If "YES", enter the farm number or contact your County FSA Office before completing this form. Farm Number: (Contact your county FSA office if you are unsure of the HEL or wetland determinations applicable to your farming interests.)			✓
7. Do any of your landlords refuse to comply with HELC requirements on any farms? If "YES", enter the farm number or contact your County FSA Office before completing this form. Farm Number:			✓
8. List affiliated persons with farming interests. See Page 3 for an explanation. Enter "NONE", if applicable.			
9. During the crop year entered in Item 3 above, or the term of a requested USDA loan, did you or will you plant and produce an agricultural commodity on land for which a highly erodible determination has not been made?			YES NO ✓
10. Since December 23, 1985, or during the current crop year, or during the term of a requested USDA loan, has anyone performed, or will anyone perform any activities to:			
A. Create new drainage systems, or conduct land leveling, filling, dredging, land clearing, excavation, or stump removal, that has NOT been evaluated by NRCS? If "YES", indicate year(s):			✓
B. Improve or modify an existing drainage system that has NOT been evaluated by NRCS? If "YES", indicate year(s):			✓
C. Maintain an existing drainage system that has NOT been evaluated by NRCS? If "YES", indicate the year(s): Note: Maintenance is the repair, rehabilitation, or replacement of the capacity of existing drainage systems to allow for the continued use of wetlands currently in agricultural production and the continued management of other areas as they were used before December 23, 1985. This allows a person to reconstruct or maintain the capacity of the original system or install a replacement system that is more durable or will realize lower maintenance or costs			✓
11. If "YES" to Items 5, 10A and/or 10B or 10C enter the following for the land the answer applies to:			
A. Farm and/or tract/field number: farm 26, 1643, 1894 and 2148 T-170, 177, 3518, 55, 57, 59, 2744			
B. Activity: clean existing ditches and do tiling (see maps)			
C. Current land use (specify crops): see maps			
D. County: Grant County***			

A "YES" answer in Items 5, 9 or 10 authorizes FSA to refer this AD-1026 to NRCS. If you check "YES" to Item 10C, NRCS does not have to conduct a certified wetland determination. (Contact your County FSA Office if you are unsure about the answers to Items 5, 9 and 10.)

Continuous AD-1026 Certification:

I have read the AD-1026 Appendix and understand and agree that my eligibility for certain USDA program benefits is contingent upon this certification of compliance with highly erodible land and wetland conservation provisions of the Food Security Act of 1985 as amended, and if a determination is made that results in a violation and ineligibility, I agree to refund all applicable payments.

- I agree to the terms and conditions stated on AD-1026 Appendix on all land in which I have or will have an interest and understand that I am responsible for any non-compliance with these provisions.
- I agree that I will file a revised AD-1026 if there are any changes in my operation or activities that may affect compliance with these provisions.
- I understand that affiliated persons are also subject to compliance with these provisions and their failure to comply or file AD-1026 will result in loss of eligibility to persons or enterprises with whom they are affiliated. (See Page 3 of this form for affiliated persons.)

12. Signature of Producer **I hereby certify that the information on this form is true and correct to the best of my knowledge, and I authorize NRCS to make a HEL and/or certified wetland determination on the tract or farm numbers listed above.**

DOCUMENTATION OF SURFACE DRAINAGE IN WETLANDS

[illegible]

I certify the information under the "as built" dimensions or physical condition as of December 23, 1985, is complete, true, and correct to the best of my knowledge. _____ (Owner) Date: _____

I have verified the above information and agree that if maintenance is performed not to exceed the extent above it will be considered in compliance with the Wetland Provisions of the Food Security Act. _____ (District Conservationist) Date: _____

APPENDIX
Tile Installation Agreement

Landowner: Blake Sime Date: 6/29/10
Legal Description: 1-117-48 Tract Number(s): 995

This agreement is to stipulate the conditions to install drainage tile near or through wetland areas.

The following terms must be followed to ensure that wetlands are not impacted by tile drainage and that the landowner and/or operator do not jeopardize present and/or future United States Department of Agriculture (USDA) Farm Program benefits. This agreement is only for USDA purposes and is not a state, county, or local drainage permit.

Items to be completed prior to signing this agreement:

1. The landowner will file with the Farm Service Agency (FSA) an AD-1026, Highly Erodible Land Conservation and Wetland Conservation Certification, describing the planned tile drainage system.
2. The landowner will provide the NRCS with a detailed plan map for evaluation purposes that includes all tile routes, sizes, types, depths, and surface inlets and outlets prior to tile installation.
3. The landowner will allow NRCS personnel permission to enter the property described above to determine the extent of existing and proposed drainage.
4. If no certified wetland determination exists, the landowner must request a certified wetland determination or delineation and allow NRCS personnel permission to enter the property described above to make the determination.

By signing this agreement, you are agreeing to the following terms:

1. The above items (1-4) have been addressed.
2. The landowner will contact the COE before tile installation to request a permit for the activity, if needed.
3. The landowner will ensure that other federal, state, county, and other local regulations have been followed.
4. The tile system will be installed as shown on the attached map. This map shows landowner-NRCS final agreed upon tile routes, sizes, and types; any required tiling restrictions; and any surface inlets and outlets.
5. The tiler must stake the project and allow NRCS personnel to inspect the route prior to installation. Any required nonperforated tile will be flagged off.
6. NRCS personnel will be allowed to inspect and verify tile installation. Following tile installation the landowner or operator will provide NRCS an "as installed" map certifying the location of both perforated and nonperforated tile. If nonperforated tile is required, the landowner or operator shall provide NRCS with receipts showing that nonperforated tile was purchased for the applicable tract.
7. Lateral effect distances will be as specified in attached Table 1. The applicable distances depend on the soil type and effective depth of the drain. Note that there are additional wetland restrictions for tile drainage systems that have surface inlets and for wetlands that receive substantial groundwater (groundwater discharge wetlands and slope wetlands). These restrictions may include requiring increased lateral effect distances, outletting the tile system to the wetland, and/or allowing no tiling in the upstream or lateral land area where the groundwater is coming from unless the tiling system outlets on the upstream end of the wetland.

9. List highly erodible fields that have been or will be converted for the production of agricultural commodities and, according to ASCS records, were not used for this purpose in any crop year during 1981-1985; and were not enrolled in a USDA set-aside or diversion program.		
10. This Highly Erodible Land determination was completed in the: Office ☒ Field ☐		

SECTION II - WETLAND

	FIELD NO.(s)	TOTAL ACRES
11. Are there hydric soils on this farm? Yes ☒ No ☐		
12. Wetlands (W), including abandoned wetlands, or Farmed Wetlands (FW) or Farmed Wetlands Pasture (FWP). Wetlands may be farmed under natural conditions. Farmed Wetlands and Farmed Wetlands Pasture may be farmed and maintained in the same manner as they were prior to December 23, 1985, as long as they are not abandoned.	FL NON-CROP	2 25
13. Prior Converted Cropland (PC). Wetlands that were converted prior to December 23, 1985. The use, management, drainage, and alteration of prior converted cropland (PC) are not subject to the wetland conservation provisions unless the area reverts to wetland as a result of abandonment.		
14. Artificial Wetlands (AW). Artificial wetlands includes irrigation-induced wetlands. These wetlands are not subject to the wetland conservation provisions.		
15. Minimal Effect Wetlands (MW). These wetlands are to be farmed at the time the minimal-effect determination was made.		
16. Intentional Wetlands (MIW). Wetlands on which a person is authorized to convert between December 23, 1985 and November 28, 1990.		
17. Restoration with Violation (RVW+year). A restored wetland that was converted between November 28, 1990, or the planting of an agricultural commodity.		
18. Restoration without Violation (RSW). A restored wetland converted between November 28, 1990, on which an agricultural commodity has not been planted.		
19. Replacement Wetlands (RPW). Wetlands which are converted to agricultural use where the wetland values are being replaced at a second site.		
20. Good Faith Wetlands (GFW+year). Wetlands on which ASCS has determined that a wetland has been restored.		
21. Converted Wetlands (CW). Wetlands converted after December 23, 1985, in which an agricultural commodity is planted on these Converted Wetlands.		
22. Converted Wetland (CW+year). Wetlands converted after November 28, 1990, in which an agricultural commodity is planted on these Converted Wetlands.		
23. Converted Wetland Non-Agricultural use (CWNA). Wetlands that have been converted to agricultural use for cranberries, vineyards or building and road construction.		
24. Converted Wetland Technical Error (CWTE). Wetlands that were converted as a result of incorrect determination by SCS.		

Certified

7/3/18 odt

5. The planned alteration measures on wetlands in fields _____ are considered maintenance and are in compliance with FSA.

6. The planned alteration measures on wetlands in fields _____ are not considered to be maintenance and if installed will cause the area to become a Converted Wetland (CW). See item 22 for information on CW+year.

7. The wetland determination was completed in the office ☐ field ☒ and was delivered ☐ mailed ☒ to the person on 8-11-95

8. Remarks. Wetlands may be cropped when natural conditions permit; however they cannot be drained or altered to destroy their wetland character for purposes of commodity production. Drainage systems in farmed wetlands (FW) may be maintained to their original design. This determination for USDA benefits only. Swampbuster provisions allow maintenance of ditches only to original depth, width, and length.

9. I certify that the above determination is correct and adequate for use in determining eligibility for USDA program benefits, and that wetland hydrology, hydric soils, and hydrophytic vegetation under normal circumstances exist on all areas outlined as Wetlands, Farmed Wetlands, and Farmed Wetlands Pasture.
