CLAFLIN PROPOSED SUBDIVISION

CANTRELL ROAD WEST OF 174TH STREET

WATER MAIN EXTENSION STUDY

Per the Board's request, we have reviewed the above referenced water main extension petition. The petitioners are investigating subdividing part of their property into at most five (5) 2.5 acre lots. The location of this proposed subdivision is shown on the enclosed map.

The District has an existing 4-inch looped water main along the north side of Cantrell Road at this location. The petitioners are asking for confirmation that the existing main has adequate capacity to serve the potential additional five (5) service connections. With the elevated tank at its refill level, the wells off and with peak hour demands, the addition of the estimated peak demand from these proposed services did not have a significant effect on the operating pressures in the system in this area.

It is our opinion that the existing distribution system has adequate capacity to serve the additional five (5) services that may result from the proposed subdivision.

Please call should you have any questions or need additional information.
